

Complit, **complete and seamless energy**, when you need it most

**CUSTOM
ENERGY
SOLUTIONS**

COMPLETE

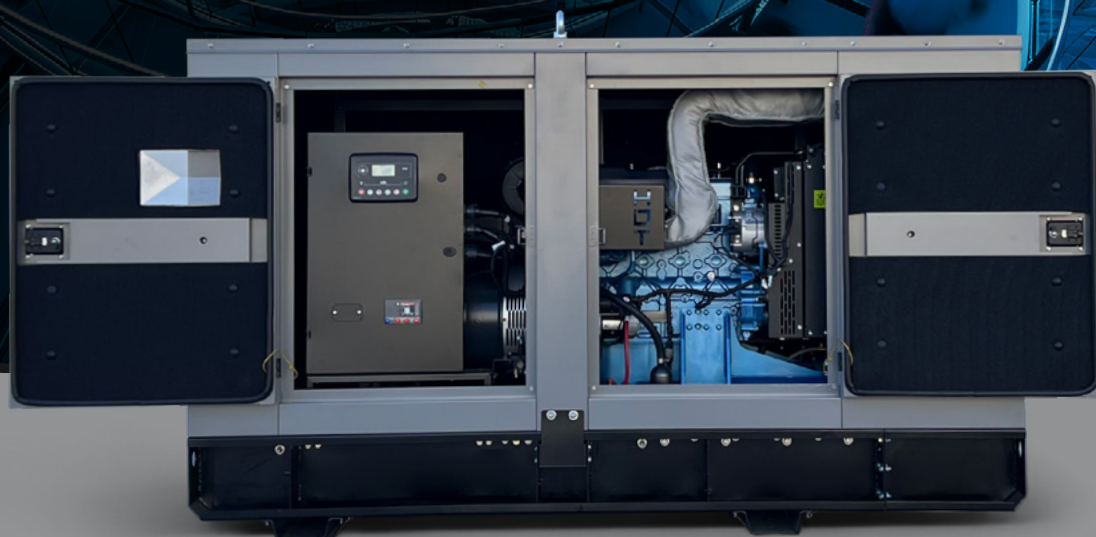

SMART

RELIABLE

SILENT

COMPLIT RANGE

Emergency generator sets where sophistication and simplicity are combined in a **single, reliable and complete energy solution**. Designed to guarantee an uninterrupted supply with no compromises.

Guaranteed reliability

Baudouin engines, known for their durability in emergency applications, with all the key components optimised to perform when it matters most.

Optimised configuration

We offer several **customisation options to really make a difference** to your projects.

Stellar power with no extras required

Complit is synonymous with complete energy: engine heating system, integrated fuel tank, thermal blankets, etc. Everything you need for emergency applications.

Soundproofed and compact

Soundproofed design, balanced dimensions, designed for demanding installations, adaptable

CUSTOM ENERGY SOLUTIONS

Power ranges and engine specifications

The **Complit** range covers a power range from **25 to 170 kVA**, with **Baudouin** engines.

Recommended operating mode

Emergency operation: Complit is there for you when the mains power fails, guaranteeing a secure and continuous power supply.

Key features

- **Baudouin engines**. Power and competitiveness for your projects.
- **Mecc Alte alternators**, a leading brand for leading projects.
- **Engine heating system** for reliable start-ups in cold conditions.
- In the **soundproofed version**. Silent power.
- **Guaranteed 8-hour autonomy**, at 75% load.
- **Deep Sea Electronics DSE 6120 MKIII** control module.

Customise your generator set

We offer a range of specially designed options to maximise the performance of emergency generators. These include:

- **Automatic fuel filling system**.*
- **Manual oil drainage pump**.
- **Air intake preheating system**.
- Various **communication modules**.

* Available from 90 kVA power.

For which sectors is this range best suited?

Industry

Generator sets for diverse industrial applications, as a main source of power supply or for emergency operation.

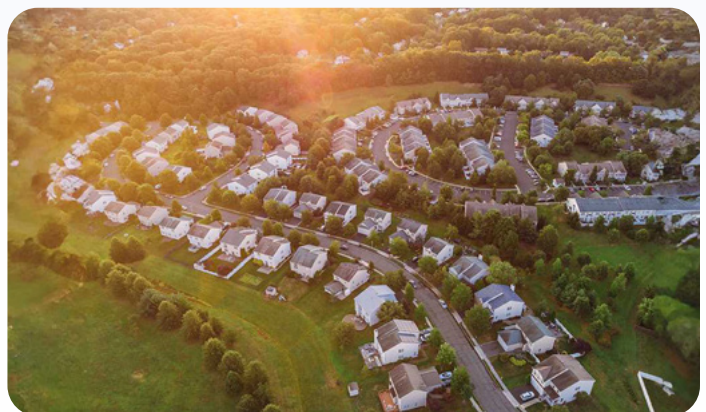

Equipment

Generator sets that are ideal for emergency use in various public spaces, such as shopping centres, town halls and sports facilities.

Residential

Power failure equipment with high attenuation elements offers reliable and silent service for housing estates and housing stock.
