

Complit, **complete** and
seamless energy, when you
need it most

**CUSTOM
ENERGY
SOLUTIONS**

COMPLETE

SMART

RELIABLE

For which sectors is this range best suited?

Industry

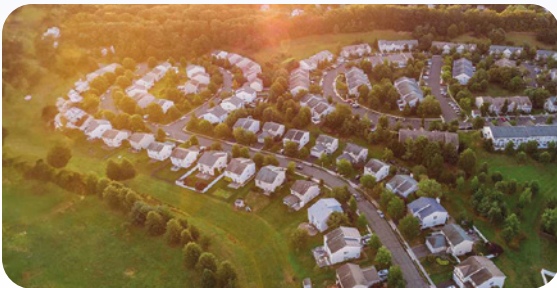

Generator sets for diverse industrial applications, as a main source of power supply or for emergency operation.

Equipment

Generator sets that are ideal for emergency use in various public spaces, such as shopping centres, town halls and sports facilities.

Residential

Power failure equipment with high attenuation elements offers reliable and silent service for housing estates and housing stock.

COMPLETE AND SEAMLESS ENERGY

Emergency generator sets where sophistication and simplicity are combined in a **single, reliable and complete energy solution**. Designed to guarantee an uninterrupted supply with no compromises.

Spare parts and assistance

With **flexible deliveries and professional assistance**, we guarantee that our equipment always works like brand-new.

Trust that responds

We want to provide you with a **competitive and reliable solution** to be able to respond to emergency applications with guarantees, where price is also important.

Stellar power with no extras required

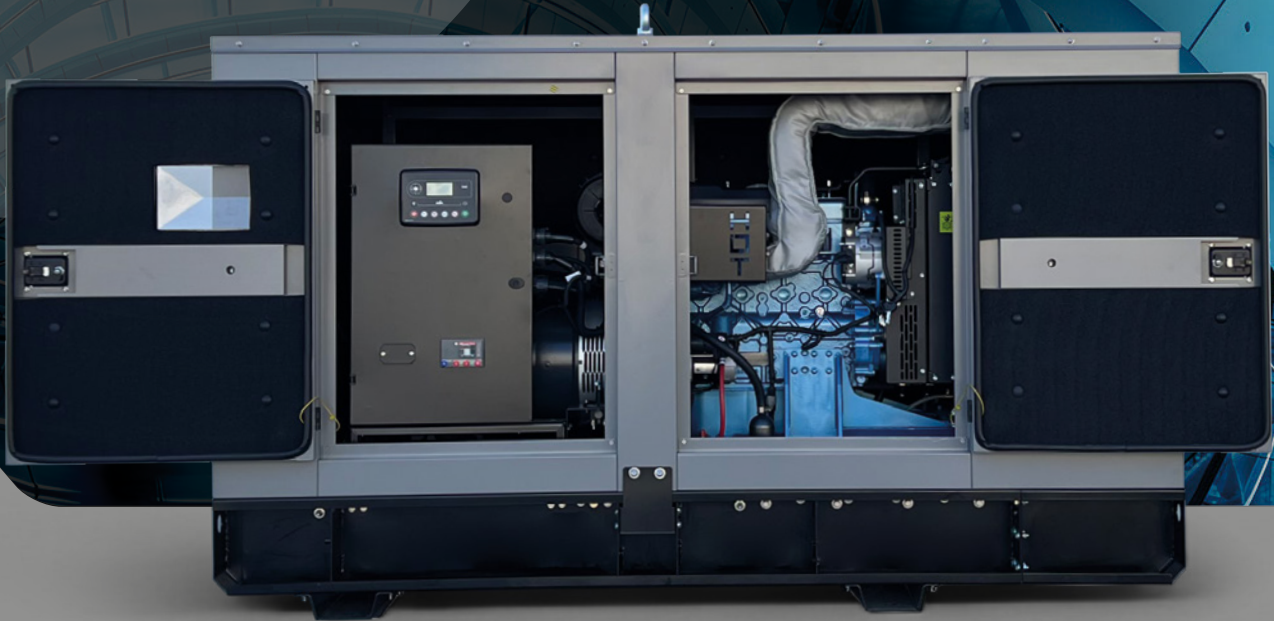

Complit is synonymous with complete energy: engine heating system, integrated fuel tank, thermal blankets, etc. Everything you need for emergency applications.

We are **stellar** energy

COMPLIT RANGE

DIESEL Silent gensets

✓ The smartest solution
for your emergency
projects

Guaranteed reliability

Baudouin engines, known for their durability in emergency applications, with all the key components optimised to perform when it matters most.

Optimised configuration

We offer several **customisation options to really make a difference** to your projects.

Control panel with DSE 6120 MKIII module

A powerful brain for a brilliant generator set. It offers smart generator management, ensuring quick start-ups and efficient and precise control at all times.

Soundproofed and compact

Soundproofed design, balanced dimensions, designed for demanding installations, adaptable.

CUSTOM ENERGY SOLUTIONS

Power ranges and engine specifications

The **Complit** range covers a power range from **25 to 330 kVA**, with **Baudouin** engines.

Recommended operating mode

Emergency operation:

Complit is there for you when the mains power fails, guaranteeing a secure and continuous power supply.

Key features

- **Baudouin engines**. Power and competitiveness for your projects.
- **Mecc Alte alternators**, a leading brand for leading projects.
- **Engine heating system** for reliable start-ups in cold conditions.
- In the **soundproofed version**. Silent power.
- **Guaranteed 8-hour autonomy**, at 75% load.

Customise your generator set

We offer a range of specially designed options to maximise the performance of emergency generators. These include:

- **Automatic fuel** filling system*.
- **Manual oil** drainage pump.
- **Air intake** preheating system.
- Various **communication modules**.

* Available from 90 kVA power.
